

Your Electronic Patient Record and Sharing of Information

What is SystemOne?

- ✔ SystemOne is a clinical computer system produced by a company called TPP.
- ✔ It lets NHS staff record patient information securely onto a computer.
- ✔ This information can then be shared with other clinicians at organisations other than your GP so that everyone caring for your health is fully informed about your medical history.
- ✔ SystemOne is currently used in GP practices, Child Health services, Community services, Prisons, Hospitals, Urgent Care and Out of Hours services, Palliative Care and many more.

Record Sharing

Share Out

If you consent to **share out** your medical record held by us then other health care organisations will be also able to see information that we have recorded about you. This information will only be visible at organisations that you have permitted to **share in** your data. So you might permit the District nurses to share in, but not Podiatry.

Share In

If you consent to **share in** then we will be able to see medical information about you that has been recorded at other health care organisations which you have permitted to **share out**. We strongly recommend that you consent to **share in** at Scott Road Medical Centre so that we get a complete overview of your health needs

- ✔ Each organisation that uses SystemOne will ask you to set your Share In and Share out preferences.
- ✔ Only organisations that you have permitted to Share in will be able to see your GP record.

Consent Form

Name	
Address	
Tel no	
Date of Birth	
Signature	

Share Out

I consent to my medical details recorded by my GP to be seen at other clinical organisations

Share In

I consent to my GP seeing medical information about me recorded at other clinical organisations
