Why reduce your Opiate pain medication?

DID YOU KNOW THAT PAIN GUIDELINES HAVE CHANGED A LOT?

Opiate Pain medication like Tramadol, Maxitram, Cocodamol, MST, Butec, Mezolar, Oxycodone:

- are **really** helpful for Acute pain, Cancer, Accidents and Injuries
- are **not that** helpful for Chronic pain, Nerve pain, Back pain or Fibromyalgia

RISKS AND SIDE EFFECTS OF OPIATE PAIN MEDICATION

- Increased falls in elderly
- Constipation
- Nausea
- Sleepiness
- Can become addicted
- Can affect driving
- Your body can get used to the tablet (tolerance)

REDUCING OPIATE MEDICATION TO FEEL BETTER

- over 100 patients have already reduced their opiate painkillers in the last 2 years
- Well Done!
